

PROFESSIONAL BY DESIGN

Synergy: the rare product of a relationship where the final value exceeds that of the individual parts. The XO series is the result of focused research and development by virtuoso players, experienced instrument designers and skilled craftsmen to achieve a specific goal – optimum performance from the whole.

This goal is evident in the combining of progressive technology with traditional features and craftsmanship. Jupiter uses proprietary techniques and machinery to produce the truest trombone slide action available. The XO saxophone designed with adjustable screws and key mechanism helps to play with comfortable feeling. Each trumpet is built around an authentic two piece valve casing and is available with a rose brass bell and reverse construction leadpipe. All hand-hammered XO bells and saxophone necks are a testament to the time and effort dedicated to the creation of each professional instrument.

ARTIST · XO TRIBUNE · XO

The exceptional playability of the XO series is accented with stunning aesthetics. Elaborate engraving, a distinctive pearl inlaid octave key, and gold trim help these horns transcend the ordinary. Jupiter's XO series includes alto and tenor saxophones, trumpets with 4 different bore sizes, solo trombones and F attachment trombones meticulously designed and handcrafted to unlock your performance potential. The player is the final factor, however, for it is the player that breathes life into the instrument. Without the player the synergy of performance is not realized. The Jupiter XO series has earned the respect of many top players because, quite simply, these horns play. But don't take our word for it; play an XO model for yourself.

TRIBUNE XO Trumpets

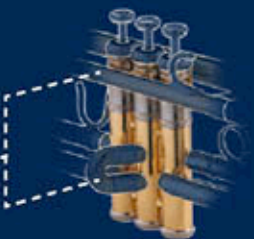

All Tribune XO trumpets are designed to meet the needs of discriminating players and offer excellent tone, feel, and playability. Utilizing computer-aided engineering and design, Jupiter blends modern technology with proven old-world hand craftsmanship such as hand lapping valve sections and hand hammering each bell.

Standard Features :

One Piece Hand-Hammered Bell

Constructed from a single sheet of material, the Tribune XO bell is formed and hand-hammered into shape. The result is a bell that provides uninterrupted vibrations and maximum resonance.

Professional Two-Piece Valve Casing

All Tribune XO trumpets feature traditional two-piece valve casing with nickel silver balusters. Skilled craftsmen take great care in hand lapping each valve casing to precise tolerances.

Optional Trim

Each Tribune XO trumpet provides ideal feel with optional trims. It includes all metal concave and pearl inlaid valve buttons, light and regular valve springs, metal and Delrin valve guides, standard and heavy weight bottom caps.

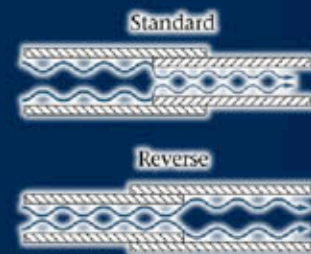

Both Elliptic and Rounded Tuning Slides

Each Tribune XO trumpet features both elliptic and rounded tuning slides to satisfy personal favors on resistance and response.

Custom Options :

Mouthpipe Styles

XO Trumpets are available with Standard (S) or Reverse (R) mouthpipe construction. A standard style offers a comfortable level of resistance many players enjoy. Reverse mouthpipe provides an uninterrupted airflow, free blowing scale, and ease of playing.

Bell Materials

Two choices of bell material are available in the Tribune XO Series. Yellow brass (Y) offers a very clear tone color while Rose brass (R) produces a warm, dark tone.

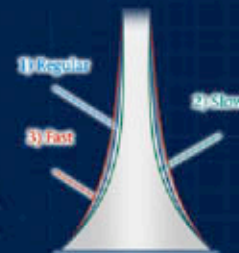

Mouthpipe Materials

All Tribune XO mouthpipes are available in two different materials. A rose brass mouthpipe will enhance the response of the instrument while also having a greater resistance to corrosion. The resonance density of 925 Sterling Silver mouthpipe produces a darker tone by enhancing lower overtones and fundamental pitch.

Bell Flare

Tribune XO Trumpets offer optional bell flares, regular (1), slow (2) and fast (3) flare with 5" bell and regular with 4.8" bell (4), to best achieve the sound that suits the player.

Bore Sizes

There are 4 different bore sizes available to produce variety, resistance and timbre to fit players' favor.

Model	Bore Size
1600/1620	Medium bore (0.453"/11.5mm)
1602/1622	Medium-large bore (0.459"/11.66mm)
1604/1624	Large bore (0.462"/11.74mm)
1606/1626	Extra-large bore (0.468"/11.89mm)

1600S-SRB#

1602S-RRR#

1600S-SRB# B^b Trumpet

- 0.453" (11.51mm) small bore
- Hand-hammered 4.8" (123mm) brass bell
- Standard and rose brass mouthpipe

1602S-RRR# B^b Trumpet

- 0.460" (11.68mm) medium bore
- Hand-hammered 4.8" (123mm) rose brass bell
- Reverse and rose brass mouthpipe

1620S-SSB# C Trumpet

- 0.453" (11.51mm) small bore
- Hand-hammered 4.8" (123mm) brass bell
- Standard and sterling silver mouthpipe

1622S-RSR# C Trumpet

- 0.460" (11.68mm) medium bore
- Hand-hammered 4.8" (123mm) rose brass bell
- Reverse and sterling silver mouthpipe

1620S-SSB#

1622S-RSR#

Remark:

1. The 3rd letter in the model stands for key. "0" is B^b key and "2" is C key trumpets.
2. The 4th letter in the model stands for bore size. There are 4 different bore sizes available: for "0" is 0.453", for "2" is 0.460", for "4" is 0.462" and for "6" is 0.468".
3. The letter "#" in the spec. code standards for bell flare. There are 4 bell flares available: "1" is 5" Regular, "2" is 5" Faster, "3" is 5" Slow and "4" is 4.8" Regular.
4. Silver-plated horn with Inner Bell Gold-Plated is available and the Model No. Will Be Changed To 16xxG-xxx#.
